

- HARD WATER STAINS -

Hard water stain are one the most common stubborn stains. They can be carried onto the glass by rain but also by water used for general cleaning. Indeed water contains minerals that get embedded into the glass and cannot be removed by classic detergent.

Solution : RENUGLASS

RENU-GLASS is a patented PH Neutral product developed in collaboration with Glass manufacturer Glaverbel (Now AGC). RENU-GLASS is a blend of rare earth able to restore any pyrolytic glass to its original condition without damaging its original characteristics.
